ACADEMY OF DENTISTRY YEAR BOOK

1943-1944

TWENTY-FIRST SESSION

VOLUME TEN

DR. CHARLES McLEAN
President

FOREWORD

In the following pages you will read of the forthcoming activities of the various dental organizations in the city of Toronto. The chief interest, perhaps, will lie in the program which the Council of the Academy of Dentistry has prepared for the coming season. It is my hope that, when the Academy year draws to a close, you will find your dental knowledge increased and stimulated by the lectures and demonstrations which will have been presented by our essayists and clinicians.

Our Annual Dinner this Fall, moves back to the Royal York Hotel, where all *special* meetings throughout the year will be held. Stated meetings will continue to be presented at Osler Hall, Academy of Medicine Building.

An innovation to be introduced this year is a Review Session to be held one week after the lectures in November, January, February and March. These discussions will include a review of the ideas and methods which are put forward by the lecturer, and dentists who have had a week in which to contemplate them, or put them into practice, will be able to share their thoughts and experiences with each other. The Review Session will be an informal discussion—or, in the vernacular of the student, “bull session”.

The Annual Winter Clinic is to be opened this year to the dentists throughout the province. Your Council feels that the Academy of Dentistry should offer this service to our confreres in the province, who do not—except once a year at the Annual Convention of the Ontario Dental Association—have an opportunity to see dental clinics and demonstrations. We therefore extend a cordial welcome to all dentists in the province to attend the ‘high-light’ of our annual program.

A post-graduate course in X-ray technic has also been arranged for which we have engaged one of the outstanding X-ray technicians and teachers of this continent—Dr. Clarence O. Simpson of St. Louis, Missouri. This all-day course in X-rays is also open to the dentists of this province.

It is a pleasure to be associated with the members of your Council who have worked conscientiously to prepare this program, and I can ask for no better thing from the members of the profession than the blessing of your confidence and the stimulus of your good-will as I attempt to fulfill my duties as your chief executive officer for 1943-44.

Sincerely,

CHARLES McLEAN.

DENTAL PUBLIC HEALTH COMMITTEE

Chairman—Edgar A. White, 1474 Bathurst St.....ME. 7488
 Secretary—Margaret Cowan, 2440 Bloor St. W.....JU. 6877
 Secretary of Speakers' Group—
 Charles W. Soules, 3045A Yonge St.....MO. 8435

Members—

Charles C. Collins, 1164 St. Clair W.....LL. 5220
 Helen J. Manchester, 1519 Gerrard St. E.....HA. 3719
 Gordon S. Paul, 1238 Bloor St. W.....LL. 4010

There is a golden opportunity for dentistry to place itself in the foreground of health work, due to the numerous groups being formed each year for advice and training in health topics.

This committee has been asked to begin its activities by contacting the Home and School and Red Cross groups. Accordingly, we are hoping to have enough of the Fellows give at least one lecture during the year, so that the burden of this work will not fall on a few.

The following have consented to give one and possibly two lectures during the year—

Mark G. Boyes
 J. Bruce Greer
 W. P. Gruer
 Walter Godsoe
 Gordon Knapp
 R. P. Lowery
 Charles McLean

S. A. MacGregor
 J. H. Peters
 Harold Skilling
 George A. Sirrs
 Cecil Summerfelt
 J. E. Tilson

We have ample material to help you give these lectures in the form of moving pictures, both silent and talking (projector and operator supplied if necessary), lantern slides, charts and literature.

If there are any more of the Fellows who will volunteer to address either of the above groups this season, please get in touch with the Secretary of Speakers' Committee:

Charles W. Soules, 3045 Yonge St. MO. 8433.

ANNUAL DINNER MEETING

Royal York Hotel, Concert Hall

6.30 p.m.

Wednesday, October 27, 1943

Guest Speaker

NORMAN H. DENNER, D.D.S.
Cleveland, Ohio

Graduating from the Western Reserve University in 1923, Norman H. Denner, D.D.S., has since practiced dentistry in Cleveland, Ohio, where he has become a leader in his profession. He organized the first children's dental health day in Cleveland (which promises to become a national day in the U.S.A.) with over 500 dentists in attendance all day, for post-graduate work in dentistry for children. He is Past-President of the Cleveland Dental Society (1940-41) and at the present time is Chairman of the Ohio State Dental Society Program Committee. He is a practicing dentist, but also a gentleman farmer, having a farm on which he keeps over forty head of thoroughbred Ayrshire cattle and a thousand chickens. Dr. Denner is also Past-President of the Kiwanis Club of Cleveland and is a fluent and enthusiastic speaker. We are happy to present him as our Guest Speaker for the Annual Dinner Meeting.

FIRST GENERAL MEETING

Royal York Hotel, Thursday, November 11, 1943, 1.30 p.m.

Osler Hall, Academy of Medicine Building, 8.15 p.m.

DR. HARRY SPIRO
Chicago, Ill.

Since graduation from the Chicago College of Dental Surgery, in 1921, Dr. Spiro has devoted a great deal of time and energy to research in the field of Crown and Bridge Prosthesis, developing many new techniques, paramount among which is the casting of a fixed bridge in one piece, from a hydro-colloid impression. He has taught his technique at the Chicago Dental Society Post-Graduate Study Club for several years, and appeared as guest lecturer in crown and bridge work in the Chicago College of Dental Surgery, Detroit College of Dentistry, and Loyola University Dental School. His clinics have been received with enthusiasm at many major dental society programmes throughout the United States.

Subject: "INLAY CROWN AND BRIDGE WORK"

This meeting will consist of two sessions—an afternoon clinic, followed by a lecture in the evening.

During the afternoon session Dr. Spiro will demonstrate, by actually constructing a fixed bridge, how to avoid difficulties, errors, and failures in fixed bridge work; how to use hydro-colloid impression material to obtain accurate impressions, and a classification of the causes of deficiencies; how to obtain a simple and correct (functional) wax bite; how to wax and invest to produce smooth definite castings; the causes of casting failures and defects.

The evening lecture will be devoted to reviewing and clarifying the material presented in the clinic.

ANNUAL WINTER CLINIC
WEDNESDAY, DECEMBER 1st, 1943
ROYAL YORK HOTEL

PROGRAM SUMMARY

8.30 a.m. - 9.30 a.m.	REGISTRATION
9.30 a.m. - 12 noon	GROUP CLINICS
12.30 p.m. - 2.00 p.m.	LUNCHEON Speaker: Gordon B. Jackson, B.P., L.L.B., K.C.
2.30 p.m. - 5.00 p.m.	GROUP CLINICS
5.15 p.m. - 6.15 p.m.	DENTAL TECHNIQUE FILMS
6.30 p.m. - 7.45 p.m.	DINNER Entertainment
8.00 p.m. - 10.00 p.m.	TABLE CLINICS

A detailed program will be available about November 15th.

SPECIAL WINTER CLINIC MEMBERSHIP

Each year more dentists from outside the Toronto area are attending the Winter Clinic. In order to stimulate further this interest, the Academy Council has decided to offer to any out-of-town practitioner who does not wish to take advantage of full membership, the privilege of attending the Winter Clinic for a fee of \$5.00. This fee will include the cost of the luncheon and dinner, but not the limited attendance clinic.

CLINICIANS

Dr. J. Frank Giffen, London, Ont.	"Partial Denture Impressions".
Dr. M. Russell Stein, New York City.	"Colour in Teeth".
Dr. Chas. H. M. Williams, Toronto.	"Classification of Pockets in Periodontia Cases".
Dr. Samuel W. Leslie, Toronto.	"Drug Therapy in Dentistry".
Dr. W. L. Hugill, Toronto.	"Synthetic Porcelain".
Dr. O. S. Clappison, Toronto.	"Crown and Bridge, Castings".
Dr. Stewart A. MacGregor, } Dr. R. G. Ellis, } Toronto.	"Dentistry for Children".
Dr. Charles R. Moses, Hamilton.	"Stabilized Full Lower Dentures"—Film.
Dr. Geo. A. Morgan, Toronto.	"X-Ray Interpretation".
Dr. R. M. Patterson, Detroit, Mich.	"Method of Re-lining Dentures".
Faculty of Dentistry Clinic, Dr. I. H. Ante, Dr. Frank Martin, Dr. J. H. Johnson.	"Immediate and Deferred Denture Service" with motion pictures.
Canadian Dental Corps:	Subject to be announced in Clinic Program.
Public Dental Health Ontario Committee. Dr. R. P. Lowery, Chairman.	Display and Short Talk.

ANNUAL WINTER CLINIC

Guest Speaker for Luncheon

GORDON B. JACKSON, B.A., L.L.B., K.C.

Born at Bala, Ontario. Graduate of Trinity College, University of Toronto, in Political Science and Economics, 1912. Osgoode Hall, 1915.

Enlisted as Ordinary Seaman with the R.C.N.V.R., and after a period of active service overseas was commissioned in 1917. Promoted later in the year to command the overseas division of R.C.N.V.R.

Dominion Secretary to the Navy League 1919-1923.

In 1923 appointed first Commanding Officer of the Toronto Division of R.C.N.V.R. Retired in 1938 as Lieut. Commander. Returned to duty in 1940, and was active as instructor and lecturer at H.M.S. York until this year.

A forceful and inspiring speaker. He will address the luncheon meeting upon a subject that will be of current interest at the time of the Winter Clinic.

ANNUAL WINTER CLINIC

M. RUSSELL STEIN, D.D.S.
Department of Anthropology, Columbia University
New York City

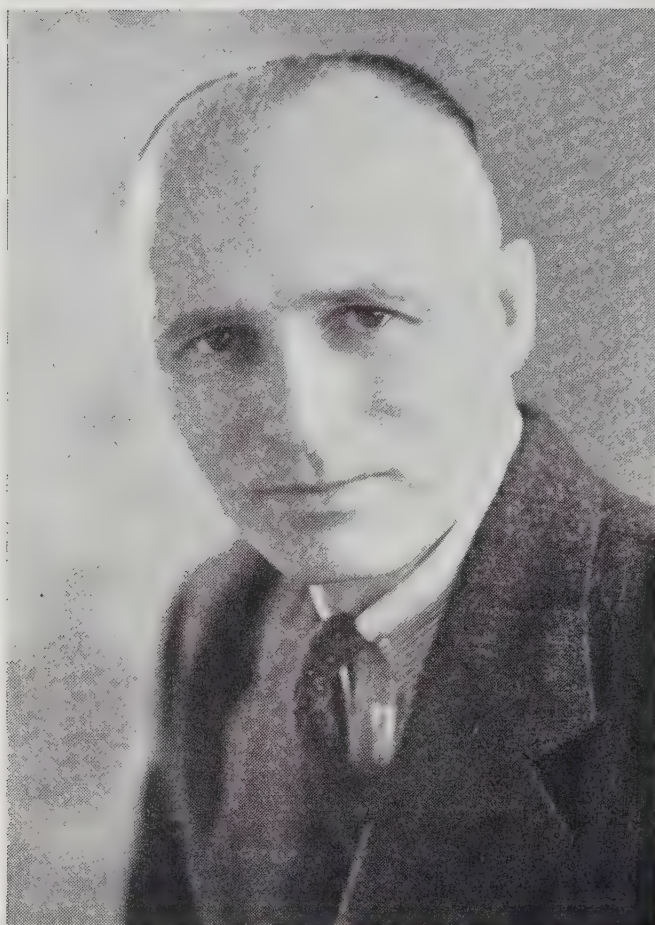

Graduated N.Y.U. College of Dentistry 1927. Instructor in dental anatomy N.Y.U. 1927-1929. Instructor in oral anatomy, Columbia 1929-1936. Instructor in physical anthropology, Columbia University 1936-1943. Research Associate in physical anthropology, Columbia University. Research consultant, Universal Dental Co. Active in general practice since 1927.

**Subject: "SELECTION OF COLOR, SIZE AND MOLD
FOR EDENTULOUS CASES"**

Questions—

1. What are the variable characters of anterior teeth?
2. What are the anatomical constants?
3. What are the color ingredients of natural teeth?
4. How can color be matched without error?
5. What are the bases for the selection of tooth color in edentulous cases?
6. Is there any relation between color and size in artificial teeth?
7. How do natural tooth forms and sizes differ from the molds of artificial teeth?
8. What are the most common signs of artificiality in dentures?
9. Can these be corrected?

ANNUAL WINTER CLINIC

J. FRANK GIFFEN, D.D.S.
London, Ont.

Graduated Royal College of Dental Surgeons, 1920. Active in local Dental Society of London. Has spent much time in post-graduate study of prosthetic dentistry.

Past President of the London Lions Club. Former chairman of one of the London suburban school boards.

President of the London Branch of University of Toronto Alumnae. Member of Board of R.C.D.S. for his district.

Subject: "PARTIAL DENTURES"

A practical demonstration will be given of the clinician's method of securing a functional lower impression, using a combination of some of the newer impression materials.

There will also be discussed some of the general considerations in Partial Denture construction.

A patient will be used for this demonstration.

This will be a "LIMITED ATTENDANCE CLINIC".

A charge of \$1.00 will be made for the first fifty applicants to enroll for each (a.m. and p.m.) session.

SECOND GENERAL MEETING

Osler Hall, Academy of Medicine Building, Wednesday, January 12, 1944

DR. LEON SAKS
Cincinnati, Ohio

Dr. Saks is a past president of the Cincinnati Dental Society, and was editor of the Bulletin of that organization, 1935-39. He is a Fellow of the International College of Dentists, and a member of the Pierre Fauchard Academy. A clinician of wide experience and outstanding ability, Dr. Saks has presented his work at several meetings of the American Dental Association, Midwinter Meetings of the Chicago Dental Society, and at various State society meetings. An original contribution to Dental Science is his 'Radiopaque oil-cotton trial filling' to check removal of caries and proximity to pulp.

Subject: "SILICATES"

Dr. Saks' paper will be a complete treatise on the subject of silicates. He will discuss the physical and chemical properties of the material, with indications for its use; pre-operative examination to determine proximity of the pulp, and precautions necessary to avoid pulp irritation and degeneration; the details of manipulation, including mixing, insertion, and treatment after setting.

Slides and motion pictures will furnish a visual description of his technique.

COURSE IN DENTAL RADIOGRAPHY

Royal York Hotel

Monday, January 31, 1944

DR. CLARENCE O. SIMPSON
St. Louis, Mo.

Dr. Simpson, a graduate of the Chicago College of Dental Surgery, and the Barnes Medical College, has limited his practice to Radiodontia for the past twenty-five years.

He is past president of the St. Louis Dental Society, the St. Louis Society of Dental Science, and the Missouri State Dental Association.

As a clinician and lecturer, Dr. Simpson is well known throughout Canada and the United States, having appeared on dental society programmes in almost every province and state.

He is the author of "The Technique of Oral Radiography", "Advanced Radiodontic Interpretation", and "Toothsome Topics".

This course, which will occupy the full day, is open to members of the Academy, and to any member of the dental profession outside the Toronto area. The enrolment fee will be ten dollars, and will admit the dentist and one assistant.

Wartime circumstances make it imperative that applications be received in sufficient time to arrange suitable hotel accommodation. In the event of the number of applications exceeding the capacity of the room available, the applications will be accepted in the order in which they are received.

All applications, accompanied by cheque, must be in the hands of the Treasurer, Dr. H. C. Bliss, 170 St. George St., not later than January 1, 1944.

CLINICAL DEMONSTRATIONS

Causes and effects of inadequate radiodontic service.
 Orderly procedure.
 Posing of patients.
 Calculation of projection angles.
 Placement and retention of film packets.
 Estimation of exposure.
 Special technic for children.
 Interapproximal, occlusal views, and extra-oral examinations.
 Dangers and protection.
 Chemical processes.
 Methods of mounting and viewing.

ESSENTIALS OF INTERPRETATION (Illustrated)

The technical requisites of diagnostic radiographs.
 Anatomic variations and effects of abnormal function.
 Evidence of caries.
 Incipient periodontal and periapical lesions.
 Preventive phase of radiodontics.
 Correlation of clinical and radiodontic evidence.
 The economics of radiodontic service.

Dr. J. H. Johnson,
 Chairman.

THIRD GENERAL MEETING

Osler Hall, Academy of Medicine Building, Wednesday, February 16, 1944

DR. BALINT ORBAN
Chicago, Ill.

Dr. Orban is a graduate of the medical schools of Budapest and Vienna Universities, and received his D.D.S. degree from Northwestern University. He is chairman of the Scientific Committee of the International Dental Federation, a Fellow of the A.A.A.S., and honorary member of several foreign dental societies. His research in Dental Histology and Pathology has made him a leading authority in that field. Several textbooks on his work have been published, including 'Dental Histology and Embryology', 'Experimental Traumatic Occlusion' and 'Biology and Pathology of the Supporting Tissues'. Numerous papers have appeared in the various dental journals.

Subject: "DIAGNOSIS AND TREATMENT OF PERIODONTAL DISEASES"

This paper will include a classification of periodontal diseases, based on the clinical, etiological and pathological pictures. Treatment problems will be discussed, and a new method of eliminating the gingival pocket will be presented. Chemical coagulation in eliminating excessive gingival tissues, and the action of oxygen will be discussed. Actual procedures will be shown by motion pictures.

FOURTH GENERAL MEETING

Osler Hall, Academy of Medicine

Thursday, March 9, 1944

DR. HOWARD C. MILLER
Chicago, Ill.

Dr. Miller has spent 25 years in the specialized practice of Oral Surgery, and has appeared on many dental programmes, speaking on this phase of Dentistry. He has been very active in dental society work, and has held numerous executive and editorial positions. His wide experience in the field of Oral Surgery should enable him to provide a very interesting and instructive evening.

Subject: "PRACTICAL PROCEDURES IN ORAL SURGERY"

The lecture has been designed to be of practical value to the general practitioner, and will include a discussion of diagnosis, treatment of infections associated with the removal of teeth, and the use of sulphonamides in Oral Surgery. Some of the more common abnormal and pathological conditions of the mouth will be identified, and operative procedures to be followed will be explained. Impacted teeth, difficult extractions, preparation of the mouth for dentures, and the management of bone cysts will be given special consideration.

The lecture will be illustrated by lantern slides.

Below is a summary of the coming year's programme:

- September 15, 1943—Annual Golf Tournament, to be held at Cedar Brae Course.
- October 13, 1943—Opening Dinner, which is a ladies' night. The wives of the members, and nurses and assistants, are invited.
- December 16, 1943—Annual Bowling Contest.
- January 20, 1944—Stag Party.

In addition, three stated meetings on dental subjects will be held. The dates of these are set tentatively for November 25, 1943, February 17 and March 16, 1944. Notices will be sent in advance of these meetings.

The approximate dates for the fall meetings of the Association of Downtown Dentists are November 3rd and December 8th, 1943, and those in the spring are January 26th, March 2nd, and April 6th, 1944. Each meeting, patterned after other years, will be a Dinner Meeting, commencing promptly at 6.30 p.m. The programmes will be scientific, social and general. All dentists in the downtown area are cordially invited, and we are looking forward to a continuance of the good fellowship which has always been the keynote of the Downtown Association. A warm welcome awaits all members of the Canadian Dental Corps who may be stationed in Toronto. Due notice will be forwarded to all members, notifying them of the place and programme of each meeting.

TORONTO CENTRAL DENTAL ASSOCIATION

DR. GEORGE COVEY
President

The Toronto Central Dental Society is to have three meetings this season, all of which are to take the form of Dinner Meetings, after which we shall have speakers of outstanding ability in their chosen callings.

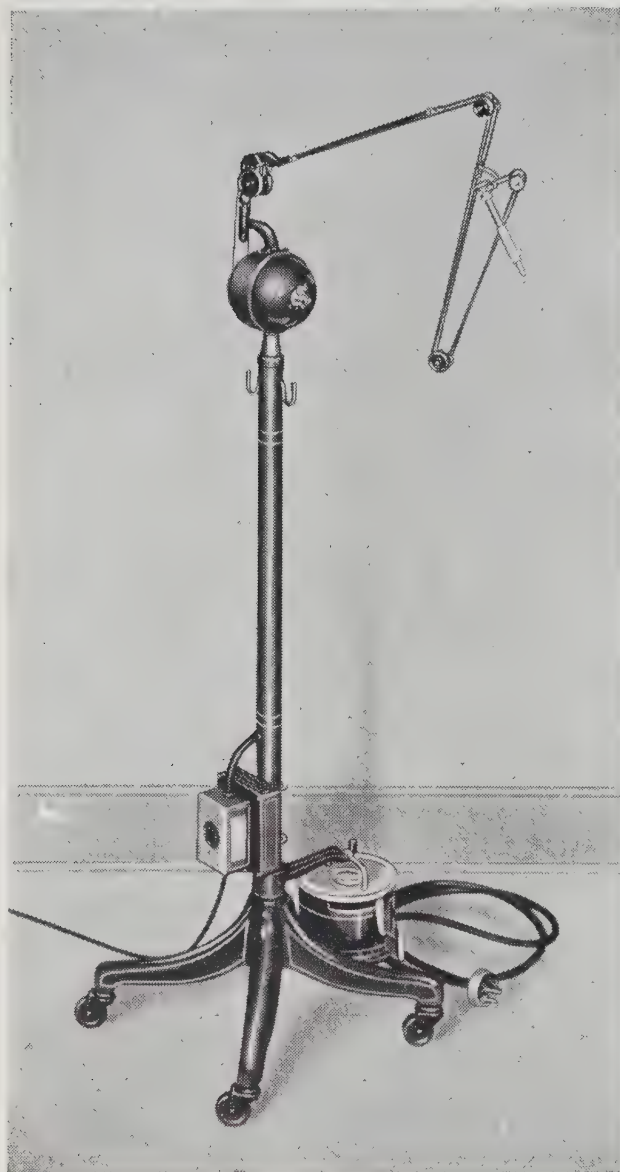

A large number of our members are in the armed forces, and this brings an increased responsibility on remaining members to see that the meetings are well attended.

The officers of the Canadian Dental Corps stationed in Toronto are cordially invited to be our guests.

Tentative dates for the meetings are November 4th, January 20th and February 24th.

What's In A Name?

Ninety-eight years ago, Samuel S. White, then a youth of twenty-two, saw that dentistry was handicapped by crude tools and materials. Practically all dentists carved their tooth forms from ivory, bone or hippopotami teeth; made their own instruments and materials used in treatment. Commendable though their efforts were, quality was questionable, standardization unknown, progress slow and uncertain.

Resolving to remedy this condition, he set before himself two objectives: make better goods and deal fairly with all who purchased his products. He lived to see his work honored by awards of distinction and one world prize after another. His name is still regarded as a symbol of quality wherever dentistry is practised.

WEST TORONTO DENTAL SOCIETY

DR. W. W. MACDONALD
President

It is the intention of the West Toronto Dental Society to hold five general meetings this season. Our programme will open November 17th with a dinner meeting, for which we hope to obtain an outstanding speaker. On January 19th, February 23rd and March 22nd we will hold dinner meetings, followed by lectures and clinics on dental subjects. Our final meeting will be a golf tournament and dinner, at Weston Golf Club, on May 31st.

The secretary will give due notice to our members as plans are completed. We ask that you make an especial effort to be present.

MOUNT SINAI DENTAL SOCIETY MERGES WITH ALPHA OMEGA

Now that the Mount Sinai Society (after sixteen years of continuous activity) is no longer one of the district societies in the Toronto Academy of Dentistry, it may be interesting to enumerate some of the highlights of the society during that period.

Mount Sinai Dental Society was organized in 1926, and during that first year had a membership of 15 dentists. It grew with the years, until in 1941, it had an active membership of 53 out of a possible 58 men, not including the 19 members of our society who, by this time, were in active service, and two more are in the process of being inducted.

It is noteworthy to mention also that all of our war-time past-presidents, since 1939, are in the Corps: Capt. Jelley, in Sicily, Major Lipsen on the East Coast and Capt. Siderberg at Newmarket.

In December 1942, the Society merged with Alpha Omega, which was founded in Toronto in 1921, and following this merger, our status as a component society of the Academy was relinquished.

It is my sincere pledge, as the last president of the Mount Sinai Dental Society, that our active support of, and participation in, the Academy, as individuals rather than as a component group, will continue in the future as in the past, and that our men will support the particular component Society within whose boundaries they fall.

August 17, 1943.

John A. Sherman, President,
Toronto Alumni Club, of Alpha Omega.

TORONTO ORTHODONTIC CLUB

PresidentM. R. Culbert
President-Elect Margaret Cowan
Secretary-TreasurerM. L. Simon

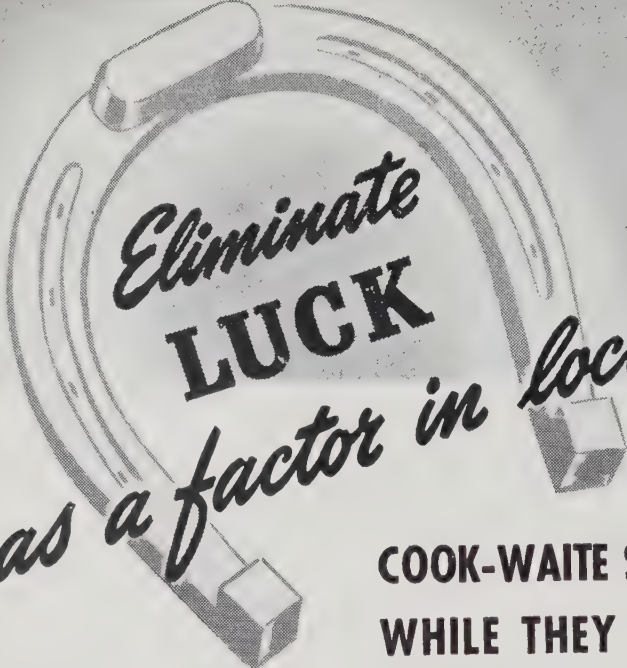

The program instituted last year will be continued for the coming year. In addition a detailed study of caries prevention and its place in orthodontic practice will be carried out. There will be both luncheon and dinner meetings.

REVIEW MEETINGS

One week following each stated meeting of the Academy, a review meeting will be held for discussion of the material presented by the various essayists. This is purely an experiment, and its continuance will depend upon the support given by the Fellows. The meetings will be held in the Royal York Hotel, at 8.15 p.m.

CHANGE OF TITLE

The Academy of Dentistry has had two publications bearing similar titles—the “Bulletin”, an annual publication, and the “Monthly Bulletin”, the news letters sent to the members at intervals throughout the year. Because of the confusion arising from this similarity, the title of the former has been changed to “Academy of Dentistry Year Book”.

Eliminate
LUCK

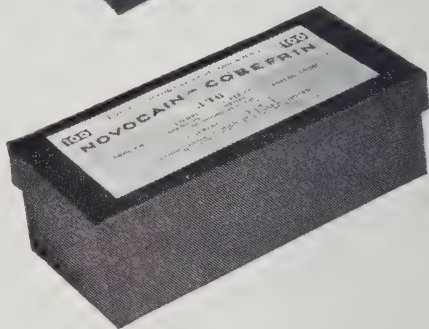

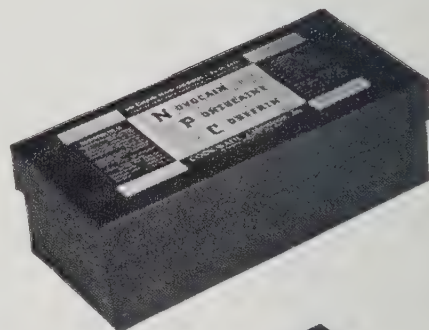

as a factor in local anesthesia..

**COOK-WAITE SOLUTIONS SAVE WORRY
WHILE THEY CONSERVE YOUR TIME**

To inject a solution with any less than the highest available margin of safety is to take a chance. No formula should be used for any patient — no matter what his health status — that could not be used with impunity for difficult anesthetic risk.

So when you rely, as you are doing now, on more frequent use of a local anesthetic to conserve time and energy for more patients, put safety and efficiency first. Choose Cook-Waite solutions containing Cobefrin — Novocain with Cobefrin, or Novocain-Pontocaine with Cobefrin.

Even in the latter solution — which, because of its Pontocaine content, extends profound anesthesia over a longer time — there is no change in vasoconstrictor concentration . . . therefore, possibility of side reactions is minimized.

ONTARIO SOCIETY OF DENTAL ORAL SURGEONS

The Ontario Society of Dental Oral Surgeons enters its third year of existence with plans to study new developments in surgery as related to dentistry. Six meetings will be held at times to be arranged at a later date and it is hoped to pay particular attention to the following subjects:

1. Sulfa drugs and their derivatives.
2. War surgery as related to dental surgery.
3. High frequency in treatment of complications of surgery.
4. Diet factor as supportive measures for surgical conditions.

The officers of the Society for 1943-44 are:

President.....W. W. Breslin, 206 Bloor St. W., Toronto
 Vice-Pres.....C. T. Moyle, 603 Medical Arts Bldg., Hamilton
 Sec.-Treas.....G. A. Morgan, 170 St. George St., Toronto

The roll of members of the Society is as follows:

W. W. Breslin, Toronto	J. F. M. Kennedy, London
J. M. Cation, Toronto	C. T. Moyle, Hamilton
W. L. Chalmers, Toronto	G. A. Morgan, Toronto
J. P. Coupland, Ottawa	E. W. Paul, Toronto

DENTAL NURSES' ALUMNAE ASSOCIATION OF CANADA

In June of this year, 24 young women graduated in the 24th Annual Convocation of Dental Nurses. We welcome them and all other graduates into the Dental Nurses' Alumnae Association. Complimentary membership is given to the graduating class, and also to our graduates now serving in the armed forces. Our war-time graduates have in the past four years been enthusiastic supporters of the Alumnae's activities. The program for the ensuing year affords varied opportunities for all to take part in our war efforts — whether it be knitting, entertaining, or helping to make our Annual Bridge for war charities, a success. The meetings will be held on the second Tuesday of each month and our tentative program for the year may be found below.

MARJORIE JACKSON,
President.

PROGRAMME

September—Homecoming.
October—Mother and Daughter Banquet,
 Mrs. P. Arkle, Guest Speaker.
November—Dr. Isabel Ayer.
December—Christmas Party and Shower for Babies in England.
January—Dr. R. G. Ellis.
February—Annual Bridge.
March—Book Review. Speaker to be selected.
April—Miss Mary Daly.
May—Musical.
June—Graduation Dinner and Annual Meeting.

Welfare	Henrietta Mann
Membership	Jean Bryson
Publicity	Ida Thompson Davis

In Days ~ Gone By

It is taken from a 1914 issue . . . a clipped portion of one of our early advertisements. In part, it reads: "*We guarantee absolute satisfaction in every piece of work we do*".

Over the years our reputation has been established on that one premise . . . complete satisfaction to the dentist in the work passing through our laboratory. As time has gone by, methods have improved, and the Allen and Rollaston technique has constantly kept pace with each advance.

In 1943, we take the *same* pride in giving the *same* thorough satisfaction in every piece of work turned out. And in addition we are in the fortunate position of being able to pass along to the dental profession the benefits of long and tried experience.

ALLEN & ROLLASTON LIMITED
Toronto - Montreal - Ottawa - Hamilton

TORONTO AFFILIATED ASSOCIATION OF ONTARIO DENTAL NURSES' AND ASSISTANTS' ASSOCIATION

The President and the Executive of the Toronto Affiliated Association have planned a varied programme for the ensuing year, one that we hope will prove educational and interesting to all. We believe that each Dental Assistant and Dental Nurse will be able to improve her efficiency tremendously by availing herself of this opportunity for friendly association with other members of her profession.

We meet at the Royal York Hotel on the first Monday in each month in Private Dining Room No. 7 at 8:00 p.m.

We are glad to have this opportunity to thank the Academy of Dentistry for the helpful interest they have shown in our organization, and to wish them every success in the future.

To every Dental Assistant and Dental Nurse we would say "Welcome".

CHRISTINE JAMES,
President.

PROGRAMME FOR THE YEAR 1943-44

September 13th—"Get-Together-Night". Speaker, Dr. Gordon Hyland,
Canadian Red Cross.

October 4th—Dr. Mark Boyes, "Dental Assistant's Relationship to the
Child Patient."

November 3rd—Speaker to be selected.

December 1st—Annual Winter Clinic in conjunction with The
Academy of Dentistry.

January 3rd—Round Table Discussion Night.

February 7th—"Doctors' Night"—Speaker to be selected.

March 6th—Speaker, our "Leading Lady," Loretta McCaughey.

April 3rd—Dr. Gordon Bates, "Control of Contagious Diseases."

May 1st—Annual Meeting and Election of Officers for 1944-45.

June—Picnic.

THE LADIES' AUXILIARY TO THE ACADEMY OF DENTISTRY AND THE CANADIAN DENTAL CORPS

MRS. EDMUND T. GUEST
President

The Ladies' Auxiliary to the Academy of Dentistry and the Canadian Dental Corps takes this opportunity of extending greetings and best wishes to the members of the Academy. In the past we have appreciated your encouragement and co-operation; and while at present our chief effort and concern is for the men in the Dental Corps, we do not forget that we are also the auxiliary to the Academy. If there is any way in which we can serve you, we will be only too happy to do so.

Due to uncertainties, restrictions and rationing, caused by the war, we are unable to announce the details of place of meeting. An interesting programme is being planned, however, the outline of which follows:

PROGRAMME

September 1943 to April 1944

September 23	3 to 6 p.m.—Executive Tea, at the home of Mrs. S. S. Crouch.
October 21	12.45—Opening Luncheon. Speaker.
November 25	2.00 p.m.—Afternoon Meeting. Book Review.
January 13	2.00 p.m.—Afternoon Meeting. Speaker.
February 17	7.00 p.m.—Dinner Meeting for members and their husbands.
March 16	2.00 p.m.—Afternoon Meeting. Nominations.
April 20	12.45—Luncheon. Annual meeting and election of officers.
Sewing Meetings each Friday, 10 a.m. to 4 p.m.—Red Cross Centre, 4 Albert St.	

We wish to extend a most cordial invitation to the wives of all Toronto dentists to join and work with us.

EXECUTIVE FOR 1943-44

President.....Mrs. E. T. Guest
First Vice-President.....Mrs. H. G. Bean
Second Vice-President.....Mrs. J. W. MacDonald

ONTARIO DENTAL ASSOCIATION

DR. JOHN H. DUFF
President

Our country has been at war for the past four years, and at times the clouds have been very dark. First it was that brave group of people on the British Isles who saved the situation when our very civilization was threatened; then, later, our gallant allies, the Russians, held the fort; now it is the combined strength of all the United Nations which is gradually turning the tide in our favour. Canada has in no small way played her part. Our own Canadian Dental Corps, of which we are so proud, has made a splendid contribution. Many members of the Academy of Dentistry, Toronto, are in this Corps, and doing their share towards making this one of the outstanding branches of the services.

I do not believe there ever was a time when it was so necessary that the dental profession should be strongly united. The Government of our country must be made to know that we, as a profession, are capable and willing to direct and give leadership to all affairs pertaining to our profession. In this the Canadian Dental Association is to be highly commended. The Academy of Dentistry has always given leadership, and several members of the Academy hold important positions in the Canadian Dental Association.

For many years the Academy, through your officers, has taken charge of the popular table clinics, provided us with many able clinicians, and supervised the arrangements of this very important and helpful session of our Convention. For this we are most grateful.

May I, on behalf of the Ontario Dental Association, extend to the Officers of the Academy our best wishes for a most successful season. We thank you for your splendid support to our Association, and look forward to a spirit of co-operation and mutual understanding.

REPORT OF SECRETARY FOR 1942-43

Under the capable leadership of Dr. Lloyd M. Grose the year 1942-43 was, in many respects, the most successful in the history of the Academy. Certain activities were necessarily curtailed or cancelled on account of the war, yet the interest shown by the increased membership and attendance at all meetings was gratifying to the President and the entire Executive Council.

Ten Executive Meetings were necessary to carry out the business affairs, and in addition, many sub-committee meetings.

The President and Council has good reason to be pleased with the increase in the number of Fellows. Paid up memberships amounted to 376, a new record, in addition to which there are approximately 150 dentists from the Toronto District in the Canadian Dental Corps in Canada and overseas.

Ten Honorary Memberships were granted to dentists who have been in practice fifty years or more. Honorary Life membership was voted Dr. Harold Keith Box, in recognition of his outstanding service to dentistry.

The following is a list of those who presented Essays during the season:

James K. Pollock, Ph.D., University of Michigan,
"Political Situation in Russia."

Le Roy E. Kurth, D.D.S., Chicago,
"Complete Denture Construction."

Philip M. Northrop, D.D.S., M.S., University of Michigan,
"Surgical Problems for the General Practitioner."

William H. Crawford, D.D.S., Indianapolis,
"Amalgam as a Restorative Material."

Philip Jay, D.D.S., Sc.D.

Leonard S. Fosdick, M.S., Ph.D.

Harold K. Box, D.D.S., Ph.D.,
"Symposium on Dental Caries."

The highlight of the year's program was the Winter Clinic in December under the Chairmanship of Dr. Charles McLean. The attendance was the largest since its inception, registration amounting to 492.

A limited attendance clinic was tried for the first time, and proved very successful. Dr. Lee W. Atkinson was the Clinician, presenting "Impression Technique for Stable Full Dentures".

Dr. R. M. Saunders addressed a large luncheon meeting on "French Canada", and Sir William Glasgow addressed the dinner meeting on "Australia Geared for War".

Eleven group clinics were presented at the morning and afternoon sessions, and 31 table clinics in the evening.

The War Services Committee under the Chairmanship of Dr. Howard Graham, did an excellent piece of work. With money donated by the Fellows, parcels were sent to all Fellows of the Academy who were overseas.

A letter summarizing the year's program was dispatched, and from the replies it is evident that our interest in the members of the Academy overseas is very much appreciated. The details of the War Services Committee appears in a separate report.

This year study groups were discontinued, as was the Ladies' Night.

Upon the retirement at the close of the year of Dr. S. A. MacGregor, Past President, and William K. Prendergast as Treasurer, expressions of regret were passed at the loss of the services of these two members.

"THESE COMFORTS MEAN A LOT TO US OVER HERE"

The above sentiment has been expressed many times in letters from the Toronto dental officers who are overseas.

They have been receiving boxes at regular intervals from the Academy of Dentistry and they approve the careful choice of contents. Another letter says "the articles in every case have proved most practical and impossible to get over here."

Our colleagues overseas look forward to these gifts from their professional friends at home, and it would be regrettable if your committee were compelled to stop sending them because of lack of funds.

Some of the 1943 subscriptions have not yet been received; please send them soon. Just to guide you, most of the subscriptions are between five and twelve dollars. You will receive a receipt so that *the amount of your gift will be deductible on income tax.*

If you have decided to subscribe, send your cheque to War Services Committee, Academy of Dentistry, Toronto, and mail it to the Treasurer, Dr. P. G. Anderson, 601 Medical Arts Building.

Ordinary restorative teeth transmit all impact shock to the ridge — this is the cause of mucosal sore spots, discomfort, possible rapid alveolar absorption. But

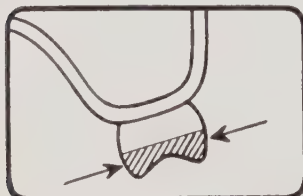

DENTA PEARL Plastic Teeth
absorb impact shock!!

JUSTI DENTA PEARL TEETH

—they're truly "kind to the tissues!"

Shaded section indicates area of impact shock absorption on ordinary teeth.

Shaded section indicates area of impact shock absorption on DENTA PEARL teeth.

The unusual resilience of DENTA PEARL teeth enables them to absorb the repeated impact shocks of mandibular pressures.

- Reduced impact shock helps preserve the ridge, prevents sore spots, possible rapid alveolar absorption.

And the grinding abrasive action (customary with ordinary teeth) is replaced with the feeling of gliding lightness and ease.

- Absence of abrasion prevents wearing down of opposing natural teeth — eliminates traumatic sensitiveness and possible loss of function.

Preserve Patient Poise with DENTA PEARL teeth . . . they're durable, light, comfortable, clatterproof, esthetic.

Today, it is everyone's duty to help conserve materials, labour and power in every way.

Printing can serve that purpose by performing many of the things normally done by personal contact.

Obviously, printed matter should be so carefully planned that there will be no waste.

IN THE PRIDE OF THE PATIENT

Not alone does pride of possession apply to precious stones, old masterpieces, fine automobiles and other personal treasures.

The patient who wears a Vitallium case has reason to glory in its ownership because it indubitably distinguishes him as a person of good taste and good judgment.

AUSTENAL LABORATORIES, INC.

Squibb Dental Cream—A safe, effective dentifrice made with Squibb Milk of Magnesia—a fine antacid. Smooth, creamy and pleasant to use.

Squibb Tooth Powder—For those who prefer powder. Provides the same advantages as Squibb Dental Cream. Safe and pleasant to use.

Squibb Angle Toothbrush—Has a small brush head mounted on a thin metal shank, bent at an angle like your mouth mirror. Has high quality, long-lasting Synton* (synthetic) bristles.

Pargran-V and Pargran-M—The former, a multi-vitamin perle; the latter, a calcium-iron capsule, supplying in proper balance the vitamins and minerals most generally insufficient in the diet. Formula meets recommendations of Food and Nutrition Board of the National Research Council. May be used to supply one-quarter, one-half, three-quarters or the full daily allowances of these vitamins and minerals. Write for literature.

Synton is a trade-mark of E. R. Squibb & Sons.

MAYBE it's amusing to see her smile now that she has lost those first teeth. But there are coming attractions on the way. Those second teeth are of prime importance—they need proper care if they are to pay dividends in personality, charm and health—proper professional care and proper home care.

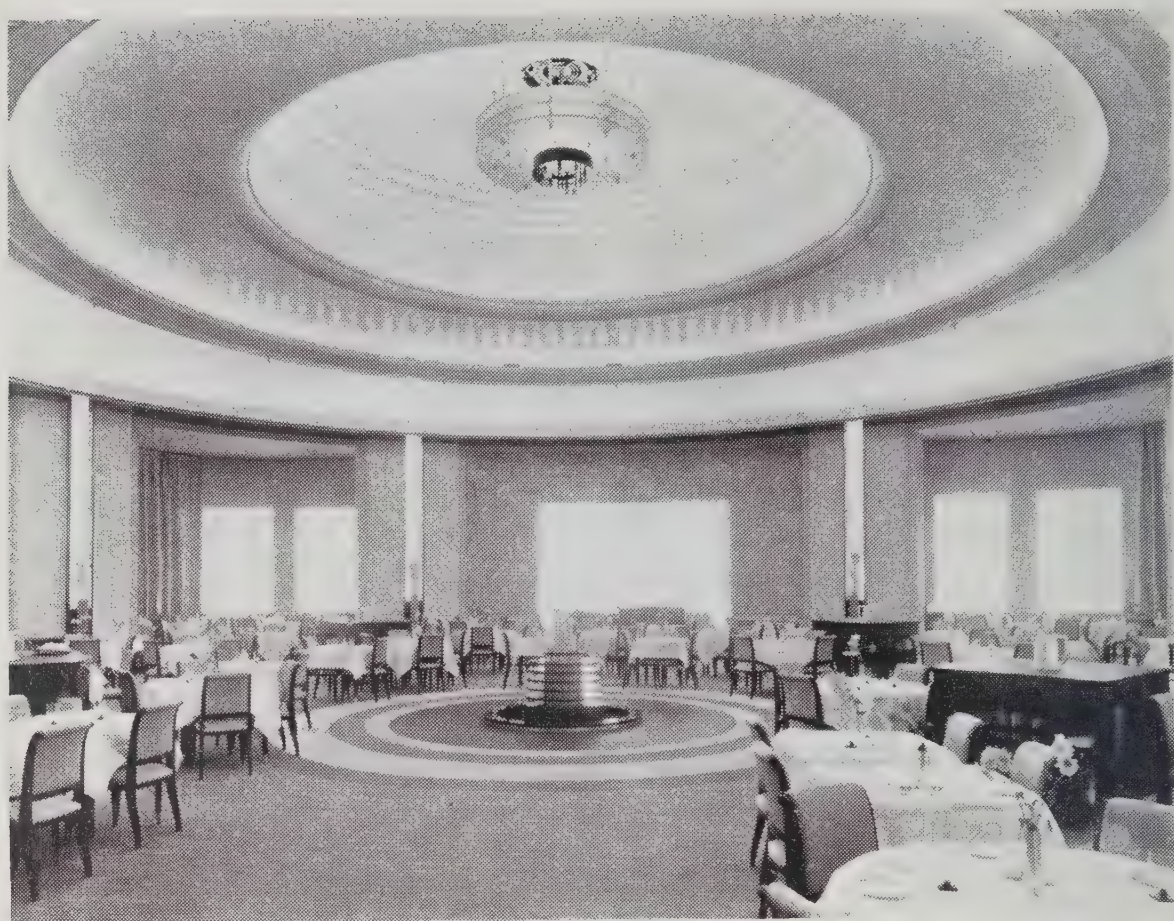

Children will be more eager to brush their teeth if the dentifrice they use has a refreshing taste. It's nice to know too that Squibb Dental Cream not only has a clean minty taste but is effective as well as safe. It can be swallowed without danger of harmful effect.

And, to get really grand results, there's nothing like using the Squibb Angle Toothbrush. Uniquely designed, it reaches exposed surfaces of all teeth—whether the dental arch is wide or narrow and with any brushing technique.

Squibb Dental Products are recognized for their high dependable quality. Give them a place in your practice.

COLDS

The VITAVAX "Immunity Treatment"

Now you can check colds, avoid days of misery and lost time, keep fit and vigorous by taking a VitaVax Capsule daily!

VitaVax is a new, double-defence against colds and lowered vitality. It combines the essential Vitamins A, B₁, C and D with Cold Vaccine — a spectacular success in preventing and allaying colds, 'flu, bronchitis and similar infections.

Keep fit and free from colds this winter. Take a VitaVax Capsule each morning. Easy to swallow, tasteless, safe for children and adults. If catching cold, take extra rest, avoid exposure, start VitaVax treatment at once.

Each VitaVax capsule contains:

Cold Vaccine specially prepared for internal use to be most effective against colds; and rich Vitamins approximating amounts in the foods listed below:

Vitamin A — 5000 Int'l Units ½ pound Butter
 Vitamin B₁ — 1000 Micrograms . 15 slices Whole Wheat Bread
 Vitamin C — 600 Int'l Units ½ glass Orange Juice
 Vitamin D — 1750 Int'l Units . . . 5 teaspoonfuls Cod Liver Oil

**1½% MONÓCAINE
with
EPINEPHRIN 1:100,000**

Equals

*4% PROCAINE - in potency!
2% PROCAINE - in safety!*

If you require anesthesia of unusual depth and duration, the Monócaine HCl 1½% solution with epinephrin 1:100,000 will suit your requirements.

Equal in potency to a 4-5% procaine solution, but no more toxic than a 2% procaine solution this newer Monócaine concentration was specifically prepared for difficult operative and surgical cases, for the preparation of bridge abutments, and jacket crowns, and for the extirpation of pulps.

The epinephrin content is further reduced from 1:75,000 to 1:100,000. Yet anesthesia is long lasting and remarkably profound.

When the Monócaine HCl 1½% solution with epinephrin 1:100,000 is used the operator does not usually require 2½cc. Consequently the shorter, more economical, and convenient Midget (1cc) and Economy (2cc) Anestubes may be used.

Order a supply of Monócaine 1½% solution with epinephrin 1:100,000 from your dealer.

*Reasons why "YOU" should and can
recommend*

HUTAX PRODUCTS

1. Scientifically correct. The Canadian Oral Prophylactic Association has recently had the paste and the powder analyzed by outstanding scientists who found them to be unexcelled.
2. The "NEW HUTAX" toothbrush has been improved in design, using finer Nylon bristles and more bristles to the tuft. This results in greater cleansing function without injury to the tissues when properly used.
3. The terms of the Association charter make it illegal for any member to benefit financially. All profit must be used for Public Dental Health Education and Benevolence.
4. You can Honestly and Safely prescribe HUTAX PRODUCTS.

Prescription pads gladly forwarded on request.

THE STORE FOR MEN — SECOND FLOOR

WAHLROTH ARMSTRONG & DENTISTS

We sartorial surgeons have a great psychological jump on the dental profession—our patients can have visual evidence of the results of our operations before they get the treatment.

We do a lot of educational work too—helping people look longer and leaner or shorter or fatter as the case may be.

And every day we're showing people the value of quality as a practical application of conservation.

We can be of service to you, too.

Wahlroth + Armstrong

"Sure...I can make
Hue-lon inlays
TRADE MARK
 myself!"

That's right! You can make *Hue-lon* inlays — right in your own office.

There's nothing complicated about making esthetic *Hue-lon* inlays... it's merely a matter of following the few easy steps which have been carefully outlined for your guidance.

But better than that is the fact that *Hue-lon* inlays require no large outlay for special processing equipment. Every *Hue-lon* accessory that you need, in addition to your present equipment, is contained in one moderately-priced package.

The color match of *Hue-lon* is so perfect as to be indistinguishable from the surrounding teeth. The material is tough, but not brittle—is not subject to cracking under normal usage. *Hue-lon* also has unusual surface hardness and does not scratch easily.

Investigate this new, better, inlay material today. *Hue-lon* was developed specifically for dentistry by the laboratories of Caulk and DuPont—the same laboratories that gave you *Lucitone*.

The Inlay Package

\$17.50

- 6 Q.P. *Hue-lon* Powders
- 1 H.P. Bottle *Hue-lon* Liquid
- 1 *Hue-lon* Shade Guide
- 1 H.P. Bottle Plascote
- 2 Sticks Inlay Wax
- 1 Stick Sticky Wax
- 1 Powder Measure
- 1 Liquid Dropper
- 2 Mixing Jars
- 1 Preparation for Class II Inlay (mounted on pedestal)
